12. $66\frac{1}{2}^{\circ}\text{N}$ latitude is known as _____.

LESSON -3 MOVEMENTS OF THE EARTH

FILL IN THE BLANKS

1. The Orbit of the Earth is _____ in shape.
2. _____ is the movements of the Earth around the Sun.
3. To rotate once on its axis the Earth takes about _____.
4. The revolution of the Earth causes _____.
5. The movement of the Earth on its axis is called _____.
6. _____ said that the Earth revolves around the Sun.
7. The rotation of the Earth causes _____ and _____.
8. A _____ year has 366 days.
9. The Earth moves around the _____

True or False:

1. The Orbit of the Earth is circular in shape _____..
2. The Revolution of the Earth causes day and night _____.
3. A leap year has 366 days _____.
4. The Earth rotates from West to East _____
5. The Sun rises in the East _____

LESSON-4 MAJOR LANDFORMS

FILL IN THE BLANKS

1. The highest point of a mountain is called a _____ or _____.
2. _____ are the natural features of the Earth surface.
3. The _____ is made up of Land and Water.

4. Several mountains may join together to form a _____ or _____.
5. A _____ is a highland with a flat top.
6. _____ are land areas that receive very little rainfall and covered with sand.
7. A _____ is a flat and low-lying land surface.
8. The _____ Plateau is the largest and the highest in the World.
9. Mountains cover _____ of the earth total land area.

Name the Following :

1. Flat and fertile land is thickly populated. _____
2. Dust Storms are common in _____
3. Hills of sand _____
4. This has steep sides and a flat top. _____

True and False:

1. The Himalayas and Alps are the young mountains _____.
2. Around 71% of Earth surface is covered by Land _____.
3. Plains have fertile soil which is suitable for agriculture. _____
4. From the place of origin to its mouth river passes through five stages _____.

LESSON-5 WEATHER AND CLIMATE

FILL IN THE BLANKS

1. The condition of atmosphere at a given place and time is called _____.
2. The _____ of a place does not change over a long period of time.
3. The world is divided into _____ major climatic regions.
4. Places near the sea coast have a _____ climate.
5. The _____ zones remain cold all the year round.
6. The amount of water vapour in the air is called _____.
7. The Sun's rays fall directly on the areas near the _____.
8. It is hot and humid throughout the year in the _____ zone.
9. _____ is the highest mountain in Africa.
10. The areas lying between the Torrid Zone and Frigid Zone are called. _____.

NAME THE FOLLOWING

1. Two Hill Stations in India. _____
2. The water vapour or moisture present in the air. _____.
3. Height above the sea level.
_____.
4. The Highest Mountain in Africa. _____.
5. The condition of atmosphere at a given place and time _____.

TRUE OR FALSE

1. Places near the Poles are hotter than the places near the Equator. ().
2. The temperature of a place decreases as the altitude increases. ().
3. Changing weather conditions cause seasons. ()
4. Winds blowing from cold regions make a place hotter. ().
